Averages = **206.2** **14.5** **2** **32.5** **700**
 LSD (0.10) = 12.4 0.7 6
 LSD (0.25) = 8.7 0.5 4
 C.V. = 4.5 3.8

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.40; non-GMO = \$3.40

Test Comments: *Brian's site experienced mostly ideal conditions, with timely and adequate rainfall. June, July and August averaged 2 degrees below normal averages. The lack of heat stress played a huge role in final yields. Crops matured more quickly than GDU's suggested they should. High temps for a week in September caused premature death from the top of the plants down, looking similar to an early frost.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
