**Test Comments:** *Planting conditions were good. Leon stated his rainfall totals in this way: May - too much; June - lots; July - plenty; Aug. - more than enough. Sept. also brought plenty of rain, plus (2) 90 degree days in late Sept., that caused corn to shut down & mature. Excellent plant color and growth. Leon stated 2015 gave his best soybean yields ever, but corn yields were slightly impaired by excess rain.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceeded the grain moisture limit for this test. **ns** = column values not significantly different
