Test Comments: *Mark Kasin, our grower cooperater, had nearly finished corn planting when we planted this plot. The seed bed was very soft mellow, requiring us to adjust the planter depth. Cool weather followed planting. Plants were short in mid June. Heavy fall rains delayed area harvest as soils remain saturated and won't dry. Despite being well drained, the combine had mud on the tires all day.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

Test Comments: *Mark Kasin, our grower cooperater, had nearly finished corn planting when we planted this plot. The seed bed was very soft mellow, requiring us to adjust the planter depth. Cool weather followed planting. Plants were short in mid June. Heavy fall rains delayed area harvest as soils remain saturated and won't dry. Despite being well drained, the combine had mud on the tires all day.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
