**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

**Test Comments:** *This was a very level and uniform site. Don, our host grower, said that the site had three different hail events throughout the growing season. During my June site visit, slight hail damage was noted. Don noted that there was some slight late season stalk bruising. The corn stood very well despite the hail as lodging was not prevalent in the plot. One early test rep dropped due to ponding.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
